

Display Period 7 Promotional Pilot Analysis

**Prepared at the request of the
2014 Commissary Council**

Data Period Ending May 10, 2014

**Presented by
Empower IT**

Key Objective

- Determine the impact of DeCA's pilot approach to distributing promoted items.

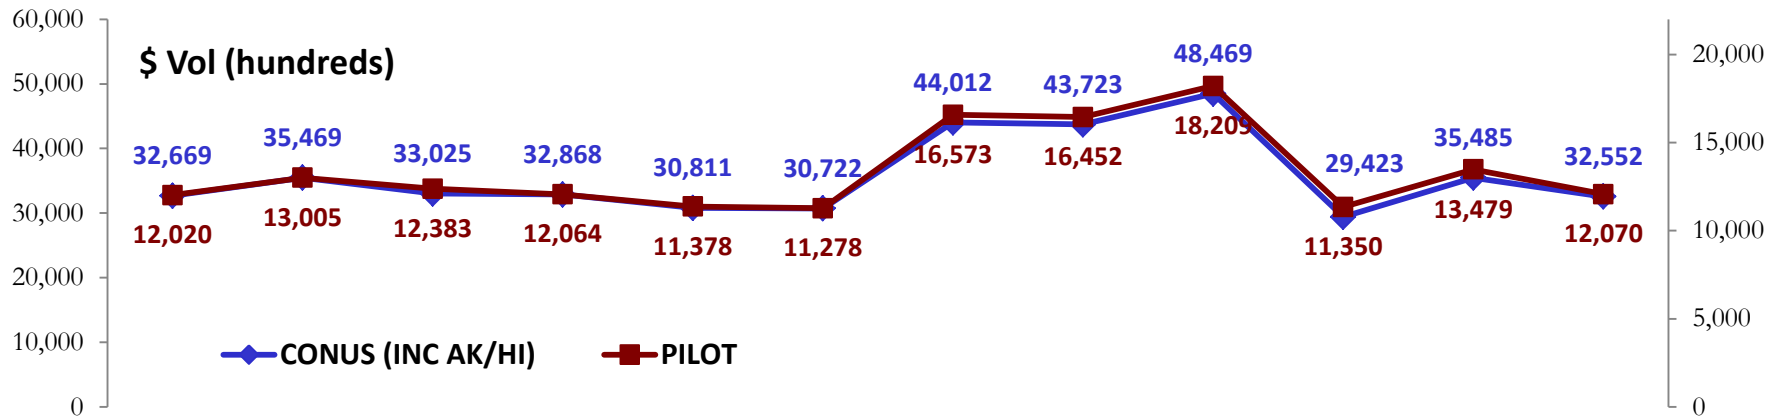

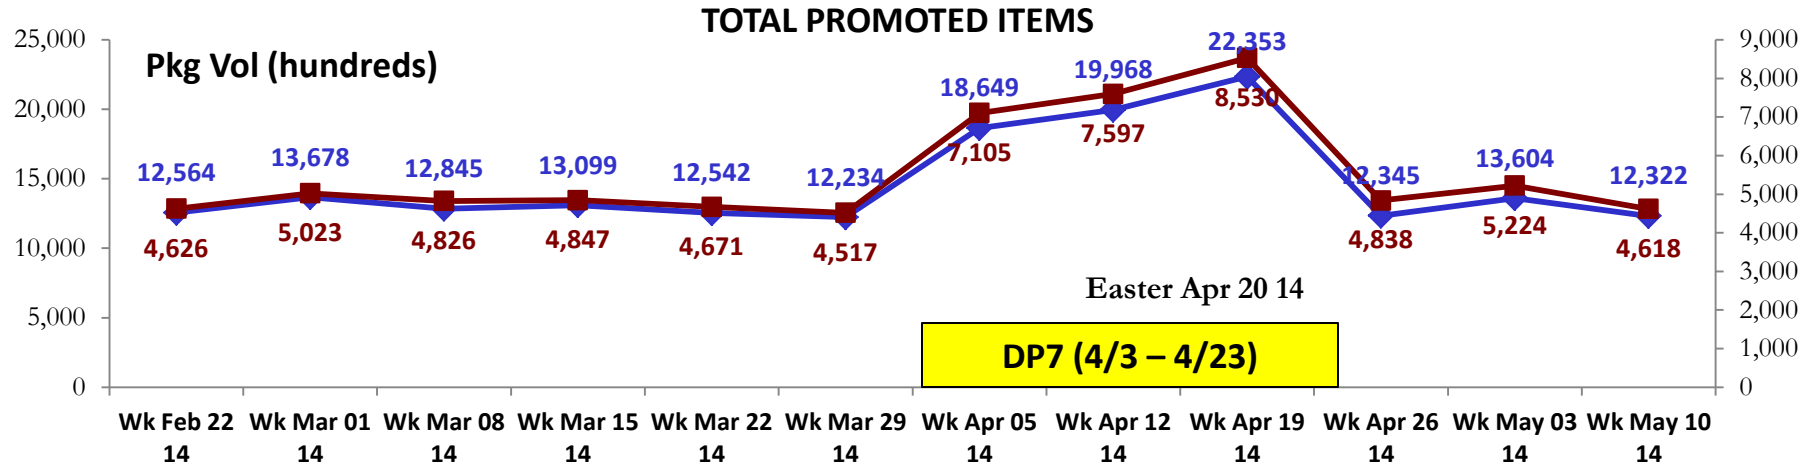

Background Data

- Product Universe is the total promoted items mandated for Display Period #7 (DP7). See Appendix for a full list of UPCs.
- Display Period #7 - Apr 3, 2014 through Apr 23, 2014
- Time period focus: 12 Data Weeks through Data Period May 10, 2014. Data weeks run Sunday through Saturday.
- This analysis focuses on the impact of the program in the West; excluding Alaska and Hawaii (Zones 6, 8, 9, 15,16, 18, 19, and 12 excl. AK) where the pilot was implemented for the stated period.

Pilot Versus Non-Pilot

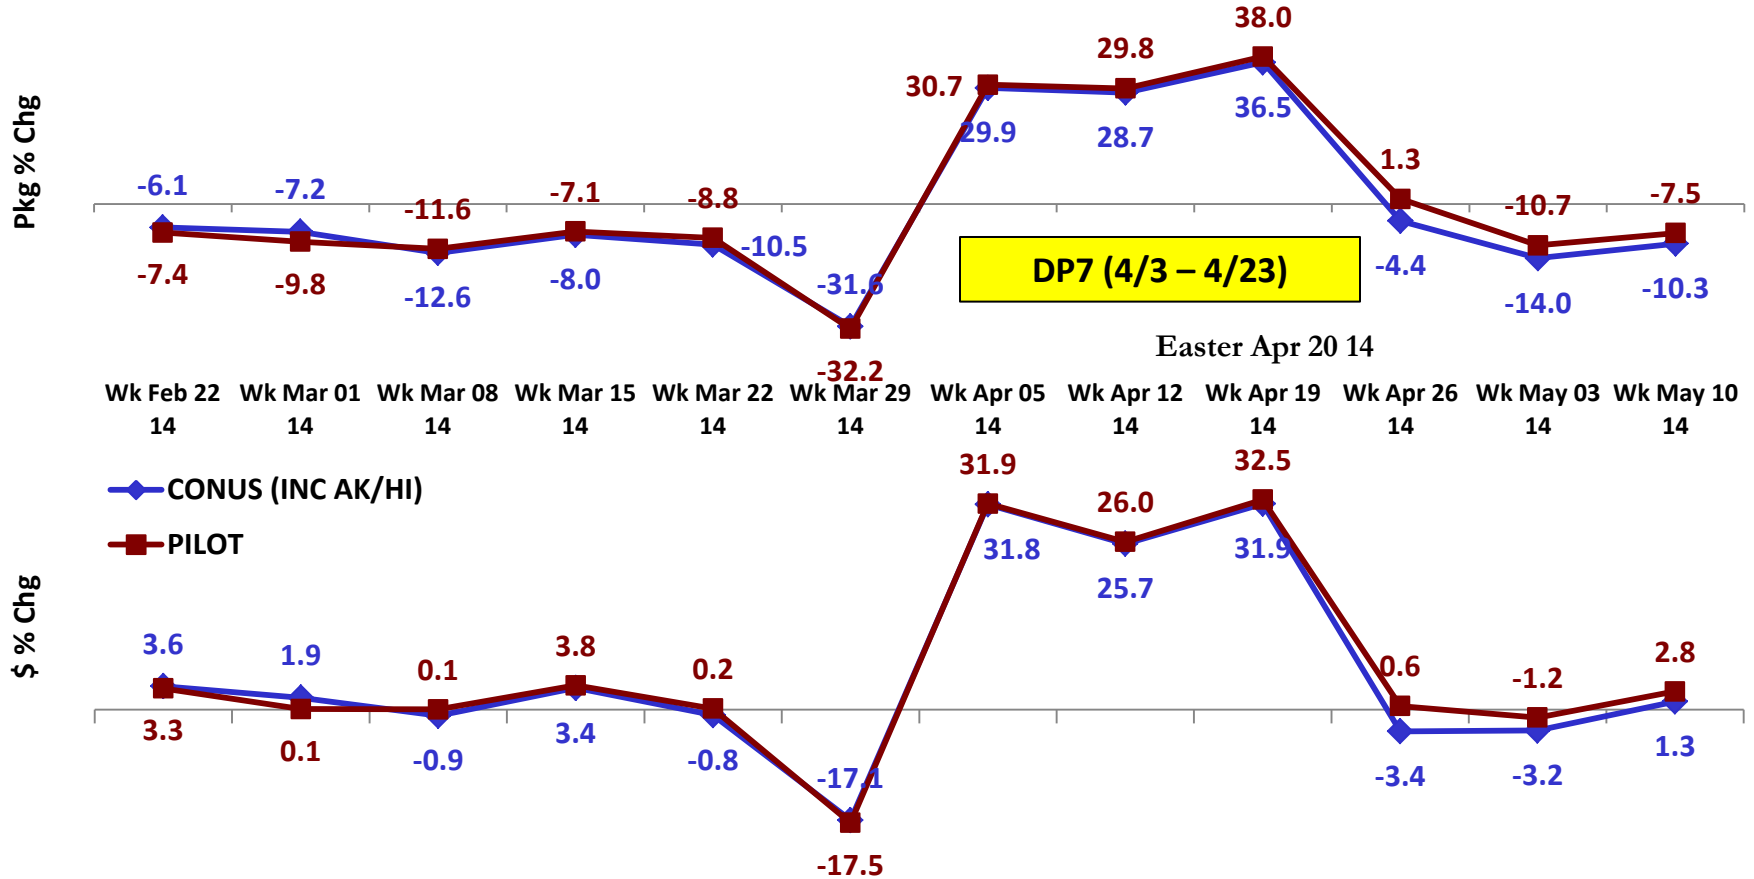

- For the purposes of this analysis “pilot” refers to stores in the following zones: 6, 8, 9, 15,16, 18, 19, and 12 excl. AK
- For the purposes of this analysis “non-pilot” refers to ConUS (incl. AK/HI) stores in the following zones: 1, 2, 4, 13, 21, 23, 24, 25, 26, 27,28, 29, and Alaska.

- Most Zones in the Pilot Test area showed a stronger Promotion Index in both dollars and packages than Non-Pilot zones.
- Post promotion declines were mitigated in Pilot Zones.
- Zones in the Pilot Test area showed nominally greater growth than the Non-pilot zones.
- Results were less poignant than the DP6 Pilot Impact, but do indicate positive direction.

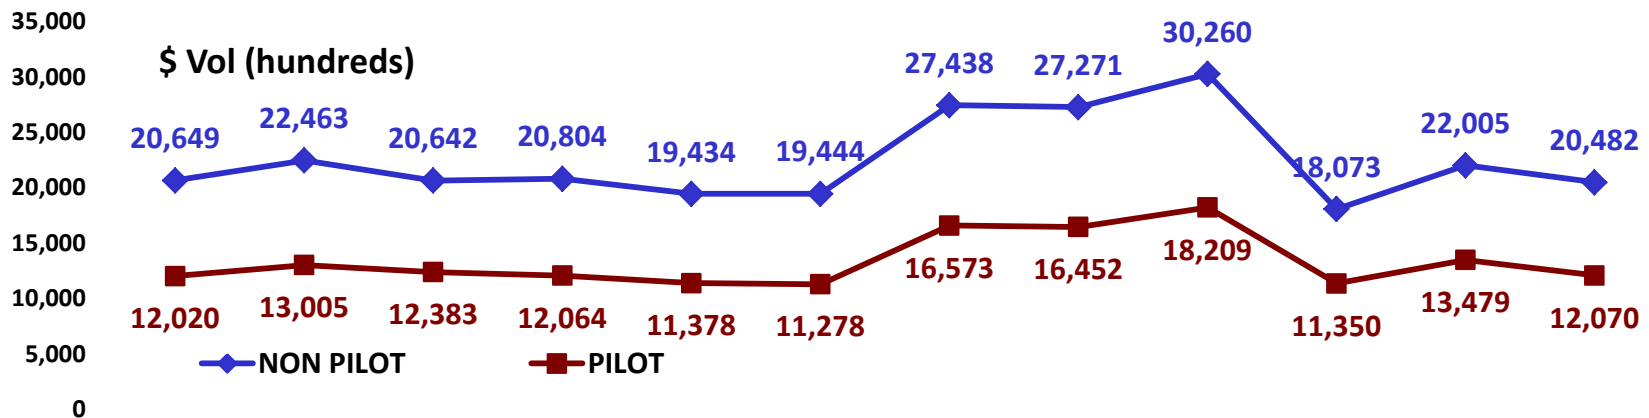

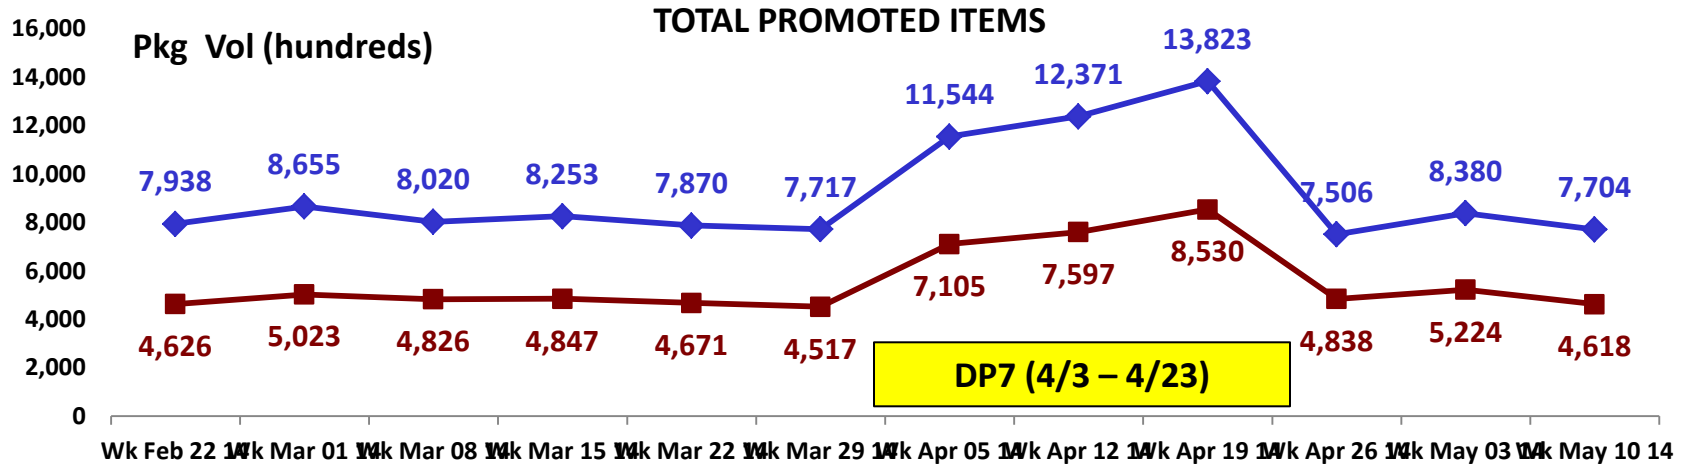

12-week sales trends generally align between Pilot and total ConUS (incl. AK/HI)

TOTAL PROMOTED ITEMS

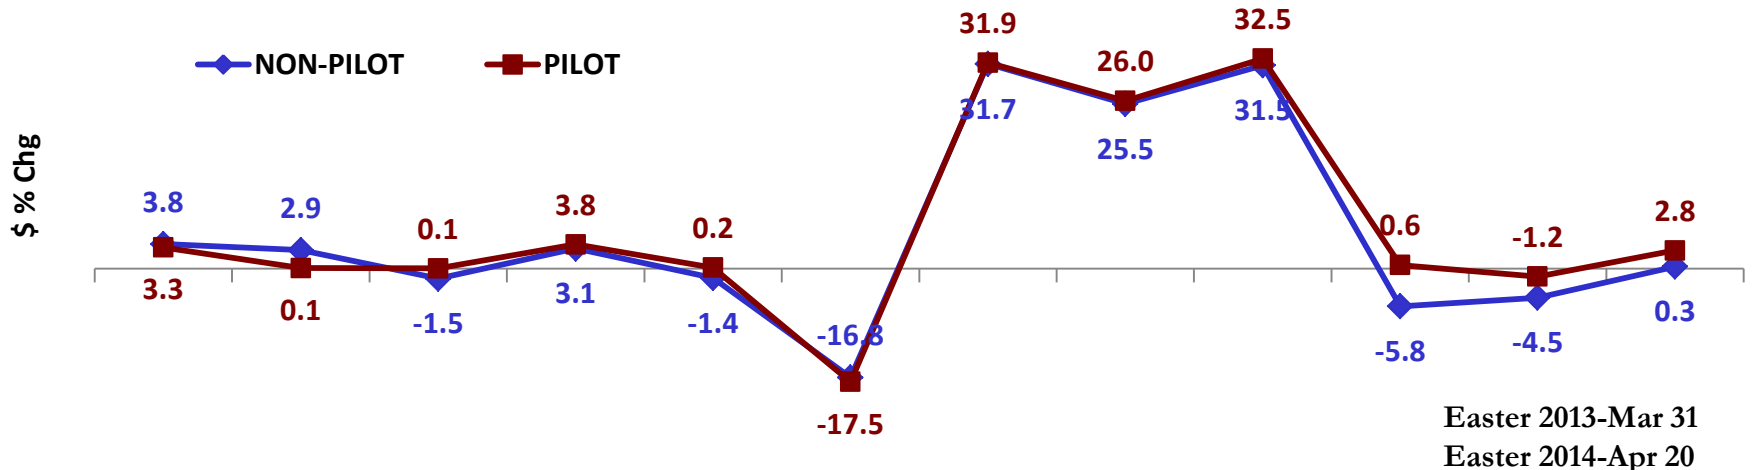

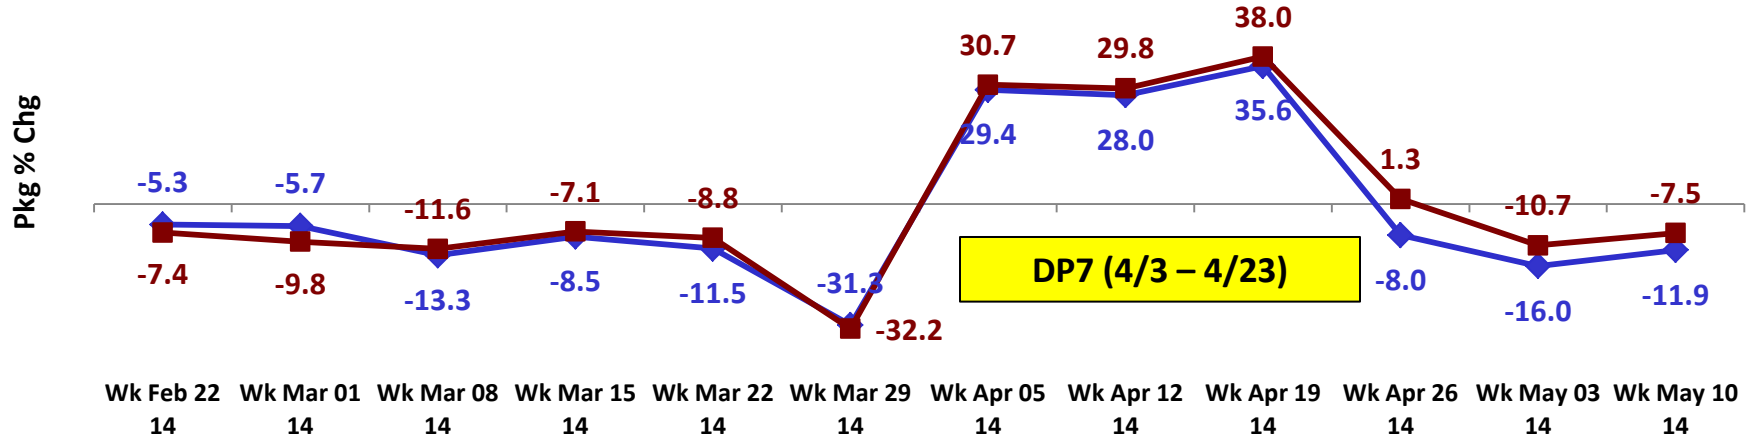

ConUS (incl. AK/HI) % Chg tracks with the Pilot Store Set, with growth a bit stronger for the Pilot stores toward the end of DP7.
